   Dr. Mark Rains and Kai Rains presented their project timeline, which began in 2011, to map, classify and evaluate wetlands from the 1850’s through the 2000’s. The focus of this project was to quantify changes to wetland extent and distribution, quantify changes to landscape hydrological connectivity, and to use this and related information in conservation planning. Over 86% of wetland area was lost between the 1850’s through the 2000’s, and much of it in the western part of St. Lucie County. 77% of wetland loss was due to agricultural conversion. While discussing the changes to landscape hydrological connectivity, they explained the drainage density has increased from over 300% between 1850’s to the 2000’s. Dr. Kai Rains discussed the goal of having a multimetric toll for restoration and conservation prioritization in the IRL watershed. The finalization of the tool and outreach is underway with a finalization goal of Fall 2023. For more information on this project, please contact Dr. Mark Rains, Dr. Kai Rains or by visiting their project website.

Ms. Ayres further discussed the IRLNEP GIS Data HUB and completed maps including public boat ramps on the IRL, One Lagoon Monitoring Network locations, and the IRLNEP Lagoon boundary maps. Ms. Ayres discussed future projects including additional project maps, story map of old fishermen tales along the IRL and defining our management conference.

**Requested Action:** Review and discuss potential options and recommend that the IRL Council Board of Directors direct staff to make policy changes as directed.

NO RECOMMENDATION WAS MADE AS MEETING A QUORUM HAS NOT BEEN AN ISSUE FOR THE MANAGEMENT BOARD.

This increase represents the changes made in FY 2022 that reallocated funds from IRL Council Strategic projects to the FY 2022 Infrastructure Workplan.
