## **REQUEST FOR QUALIFICATIONS RFQ #2022-001**

### ***Building Lagoon-wide Capacity for IRL Seagrass Recovery Through Infrastructure Investments***

#### **INTRODUCTION**

The IRL Council (Council) was established as an independent special district of Florida on February 24, 2015, via an inter-local agreement dated February 19, 2015. The Council was created under the authority of §163.01, Fla. Stat., and §189.012(3), Fla. Stat. Its operational area is within Brevard, Indian River, Martin, St. Lucie and Volusia counties. The Council is the local sponsor for the IRLNEP under the EPA's National Estuary Program. A Map of the IRLNEP project boundary is attached in **Exhibit "A"**.

The IRL Council (Council) is seeking Qualifications from qualified public and private organizations that are actively participating in IRL seagrass restoration and species recovery efforts. The goal of this RFQ is to identify a number of qualified entities that represent regional and local centers of excellence to anchor the IRL Community of Practice in Seagrass Restoration and Species Recovery.

Seagrasses were ranked as a Level 1 "Critical" Vital Sign health concern in the IRL Comprehensive Conservation and Management Plan – Looking Ahead to 2030 (adopted 2019). The SJRWMD (2021) estimated a 58% loss of seagrass acreage and an 89% loss of seagrass coverage lagoon-wide since 2009. As a result, even with improved water clarity and quality, natural recolonization and repopulation of seagrasses throughout the lagoon is expected to be slow. Preliminary pilot studies funded by the IRL Council indicate that seagrass replanting efforts have delivered varied levels of success. Factors that can impact success include, but are not limited to, water clarity, water quality, sediment type, sediment stability, exposure to land based freshwater inputs, exposure to nearby land-based erosion and herbivory.

The desired outcome of this RFQ and funding opportunity is to build capacity among the IRL seagrass restoration Community of Practice through investment in infrastructure and equipment for land-based or in-lagoon seagrass nurseries that can support expanded plant cultivation for large-scale restoration projects as well as support the associated research needed to better understand seagrass ecophysiology and cultivation.

Qualified applicants can receive 1 to 5 years of grant support for infrastructure improvements and restoration support services. The RFQ recognizes the capabilities for capacity building the 4 regional restoration centers identified in the CCMP, but the RFQ will accept responses from any private or public sector applicant who can demonstrate expertise and experience in seagrass restoration. The IRLNEP encourages applications from multi-organizational partnerships and private-public partnerships.

The IRL Council will negotiate a service contract with multiple public or private-sector contractors that will be for a one-year term and/or renewable for up to 5 years, contingent on satisfactory annual contract performance and availability of funding.

Interested firms may obtain a copy of the RFQ from the IRL Council website [www.onelagoon.org](http://www.onelagoon.org).

### **SOURCE OF FUNDS:**

This competitive RFQ will identify qualified applicants to secure one-time Congressional funding for infrastructure improvements. Proposal funding is contingent on amount and availability of funds delivered to the IRL Council from the Bipartisan “*Infrastructure Investment and Jobs Act*” (“Act”) that became law on November 15, 2021. Within the Act, \$132 million was appropriated to the 28 National Estuary Programs to be delivered over the next 5 years (2022-2026).

The IRL Council and IRLNEP are estimating annual revenues at \$908,800 per year for each of the aforementioned 5 years. These funds are anticipated to be allocated between this RFQ, approximately 30%, and a Competitive Infrastructure Investments Request for Proposals (RFP), approximately 70%. The IRL Council Board of Directors has sole authority to allocate funds based on proposal review, ranking and recommendation of a qualified applicant or applicants. The IRL Council will place a high priority on applicants who can provide transformational benefits to seagrass restoration in the Indian River Lagoon. Awards to multiple applicants are anticipated from this RFQ. Applicants to this FY 2022 RFQ announcement may request funds for a single year or multiple years (up to 5 years) depending on project scope. The IRL Council will adhere to the Congressional purpose of the Act to focus on infrastructure, jobs, and to allocate federal funds through implementation of a competitive, timely, responsible and transparent process.

### **QUALIFICATION AND FUNDING PRIORITIES:**

This RFQ focuses on firms that are committed to restore and recover IRL seagrasses with consideration for benefits associated with Clean Water, Healthy Habitats, Strong Communities, Species of Concern, Environmental Justice, and Climate Change Resilience. Because annual federal funding is modest, allocation of funds from the Act will be heavily influenced by applicants and projects that provide significant benefits and lasting return on investment value.

Applicant expertise should align with priorities identified in the IRL CCMP. Contract agreements of 1 to 5 years will be awarded based on several broad criteria:

1. Will investment of federal funds to the applicant result in a significant improvement in infrastructure and organizational capacity to restore IRL seagrasses and support research critically needed to guide seagrass restoration success?
2. Will the investment create or support jobs over the 1-5 years of funding? Will the jobs created by the investment be sustained beyond the 1-5-year term of federal funding?
3. Once infrastructure investments are made, is the applicant able to financially and operationally sustain expanded seagrass restoration and recovery efforts after federal funding from the Act sunsets?
4. Will infrastructure funding to the applicant enhance the capacity of other local and partner organizations to fulfill their seagrass restoration and recovery goals?
